GENERAL NOTES

Detail in these tables may not add to totals due to rounding.

Unless otherwise noted, all dollar figures are in current dollars.

Because of the formula used for calculating real gross domestic product (GDP), the chained (2009) dollar estimates for the detailed components do not add to the chained-dollar value of GDP or to any intermediate aggregate. The Department of Commerce (Bureau of Economic Analysis) no longer publishes chained-dollar estimates prior to 1999, except for selected series.

Data in these tables reflect revisions made by source agencies through February 28, 2014. In particular, tables containing national income and product accounts (NIPA) estimates reflect revisions released by the Department of Commerce in July 2013 and tables containing estimates from the current employment statistics (CES) survey reflect revisions released by the Department of Labor in February 2014.

Excel versions of these tables are available at www.gpo.gov/erp.

NOTES ON STREAMLINING

With extensive economic data now available online, the 2014 statistical appendix has been streamlined. Tables that have been retained (some in modified form) are listed on the following page, matched to their 2013 table numbers.

Data presented in the past remain available to the public through their source agencies. For each table in last year's statistical appendix, the Sources section starting on page 397 lists source agency (or agencies), website, and data program for the data featured, along with selected contact information.

Historical data may be subject to revision, so source agencies should be consulted for data no longer shown on these pages. Early data that remain static and are not available on a source agency website, however, may be found in previous issues of the *Economic Report of the President* at www.gpo.gov/erp and fraser.stlouisfed.org.

Statistical agencies and data aggregators also offer tools allowing users to download, graph, map, and program data themselves. The Federal Reserve Bank of St. Louis, a notable aggregator of economic data, features an online database at its Federal Reserve Economic Data (FRED) site comprising more than 154,000 economic time series from 59 national, international, public, and private data sources. In addition to mobile apps and other data tools, FRED provides application programming interfaces (APIs) to allow developers to create applications or programs that directly utilize its website content. For more information, see www.research.stlouisfed.org/fred2.
